

10-8-2: SIGN REGULATIONS:

B. Sign Design:

It is recognized that it is desirable to have some diversity of sign design within the Snyderville Basin. However, it is also desirable to ensure that materials and color schemes used on signs shall be compatible with the image of the Snyderville Basin community and mountain environment. All materials and color schemes of all exposed surfaces of signs shall compliment the building located on the premises. Signs not compatible with these criteria shall not be permitted.
